19.2 Fair Value

(a) Financial instruments that are carried at fair value

AFS financial assets are measured at fair value at different measurement hierarchies (i.e. Level 1, 2 and 3). The hierarchies reflect the level of objectiveness of inputs used when measuring the fair value.

(i) Level 1: Quoted prices (unadjusted) in active markets for identical assets

Quoted equity is measured at Level 1. The fair value of quoted equity is determined directly by reference to its published market bid price as at 30 June 2014.

PART A: EXPLANATORY NOTES PURSUANT TO MFRS 134

19. FINANCIAL INSTRUMENTS (CONT'D.)

19.2 Fair Value (Cont'd.)

- (a) Financial instruments that are carried at fair value (Cont'd.)
 - (ii) Level 2: Inputs other than quoted prices included within Level 1 that are observable for the assets, either directly (prices) or indirectly (derived from prices)

Unquoted bonds are measured at Level 2. The fair value of unquoted bonds is determined by reference to the published market bid price of unquoted fixed income securities based on information provided by Bond Pricing Agency Malaysia Sdn Bhd.

(iii) Level 3: Inputs for the assets that are not based on observable market data (unobservable inputs)

The Group does not have any financial instruments in Level 3 as at 30 June 2014.

RM'000	Level 1	Level 2	Total
AFS Financial Assets			
Quoted equity	87,072	-	87,072
Unquoted bonds	-	107,902	107,902
	87,072	107,902	194,974

There were no transfers between Level 1 and Level 2 during the six months and quarter ended 30 June 2014.

(b) Financial instruments that are not carried at fair value

Financial instruments classified as HTM investments, loans and receivables and financial liabilities are carried at amortised cost.

The carrying amount of these financial instruments, other than staff loans receivable, are reasonable approximation of their fair values due to their short term nature.

The carrying amount of staff loans receivable approximates its fair value, and is estimated by discounting the expected future cash flows using the current interest rates for loans with similar risk profiles. This represents a Level 3 input under the measurement hierarchy.

23. COMMENTARY ON PROSPECTS AND TARGETS

The global economic environment has shown marginal improvement albeit at a slow pace. Looking ahead, economic growth is expected to remain uneven across the globe. According to the IMF, strong recovery is expected in the advanced economies, with growth forecasted in the United States (2014 forecast: 2.8%; 2013 actual: 1.9%) while growth is projected to be positive but varied in the Eurozone (2014 forecast: 1.2%; 2013 actual -0.50%). As for emerging markets, growth is expected to be moderate, aided by stronger external demand from advanced economies. Continued uncertainties over the economic and monetary developments in key global economies as well as geopolitical developments are likely to generate continued volatility in the global financial markets.

The Malaysian economy registered a strong growth of 6.2% in the first quarter of 2014, driven by a stronger expansion in domestic demand and recovery in exports. Moving forward, Malaysia's economy is expected to grow at a slower but stable pace of a forecasted 4.5% to 5.5% for the year. The underlying strong fundamentals of the Malaysian economy and economic growth prospects are expected to continue to support investors' confidence. The recent increase in the overnight policy rate will further strengthen the country's economic position. The ample liquidity in the financial system is also sufficient to support the capital market over the medium term.

Against this backdrop, we expect the equity market to see more foreign inflow and continuing support from local institutions. Crucial to the growth of our market in the current economy are our outreach activities as well as the ability to provide diversified and investable products to existing and potential investors.

The challenges and uncertainties which affect investor sentiment and appetite on the equities market and the dry El Nino weather (which will affect palm oil production) will continue to affect the trading of our two key contracts on the derivatives market - the FKLI and FCPO contracts. We expect the latter contract to pick up in volume in the remaining months of the year. Our efforts to deepen our distribution channels, promote our products and widen our range of derivatives offerings are expected to further improve volume traded this year.

The Islamic capital market continues to register positive growth. The need for Shariah compliant products is expected to increase further due to the demand from Islamic funds as well as those funds dedicated to ethical investments. Wider usage of Murabahah contracts is expected to spur greater utilisation of our commodity trading platform, Bursa Suq Al-Sila' (BSAS).

We remain focused in developing our securities, derivatives and Islamic markets, despite the challenging environment, to ensure sustainable performance.
